Roller Crowbar

Product code: SKRC

This is a heavy duty roller crowbar. Lever one side of heavy items off the ground (especially when there is barely any clearance) to create space to slide in jacking units or machine skates which can then raise/move the equipment.

- Two load capacities to choose from (1.5 ton or 5 ton)
- Reduce the effort needed to gain clearance

Load capacity	1.5 ton, 5 ton
Skate/jack type	Roller crowbars
