Skoots Moving System

Product code: SK600-5000

Large rectangular, weighty objects such as vending machines and safes can be very awkward to move. The hydraulic Skoots Moving System, manufactured here at BIL Group, is ideal for shifting safes, vending machines, switchgear units, bathroom pods and more over short distances.

- Save time & effort - hydraulic jacks do the heavy lifting/lowering
- Improved safety & control compared to skates, dollies etc
- Easy to train users quickly – minimal training needed
- To see how simple the system is to use, watch the Skoots video (from 1:18)
- To suit your task, choose from 600kg to 5,000kg load rating
- Includes two units (to work in tandem), plus two straps
